

They're Counting On You, Congress.

Patient access to timely, efficient healthcare is being threatened **TODAY** and requires your immediate attention. The Alliance of Specialty Medicine, representing more than 200,000 physicians and the millions of patients they serve, urge you to:

- ◆ Stabilize the Medicare physician payment system and prevent reimbursements from being slashed by more than 26 percent over the next six years
- ◆ Pass comprehensive medical liability reform that includes a cap on non-economic damages
- ◆ Enact patient safety legislation that gives physicians the tools they need to move forward with comprehensive quality improvement projects
